

THE TEACHING SYSTEM

EXPLORING INDONESIA'S CURRICULUM

"Curriculum is not just what is taught, but what is learned."

— Unknown

Indonesia have different types of curriculum: K-13, Curriculum Merdeka, and Cambridge Curriculum.

In the school where I attend, we follow the Curriculum Merdeka (Independent Curriculum), which emphasizes student-centered learning, project-based learning, and education grounded in local context. This approach aims to provide a more personalized learning experience, allowing teachers greater flexibility to adapt the content according to their students' needs and interests.

Organizing learning and guidance effectively, innovatively, creatively based on Information and Communication Technology (ICT)

The teaching methods used by the teachers at SMP Mutu align with the Curriculum Merdeka and the school's third mission mentioned above. Their approach is highly student-centered and emphasizes authentic student assessment. After each lesson, there is a practical application of what the students have learned, allowing them to fully understand the material through its application in local contexts.
